

The Lifted bathtub for the disabled and chronically ill bathing is the basic device from DELTOM's offer. It is available in several variations and configured with additional equipment provides several sets for patient's hygiene, care and rehabilitation. Our **medical bathtub** makes patient's life more comfortable and supports medical personnel in everyday duties.

The Bathtub with hydro massage option provides rehabilitation massage of the whole body allowing relaxation during treatment.

The bathtub type WPC-300/220 (**hospital, rehabilitation**) is the freestanding device with no need of foundations.

Two tub lengths.

Power: 230 V

Equipment:

- hydraulic lifting mechanism
- mixing or thermostatic water tap
- shower jet
- thermometer
- underwater hydro massage installation with hydro massage jet
- bathtub and hydro massage installation disinfection system
- bathtub drying system
- side handrails and footrest
- manual lowering valve

The Care bathtub with corresponding transport trolley becomes "**the integrated system for care, transport and hydrotherapy** of disabled and chronically ill".

This system allows full care cycle (from bed to bed) with minimal effort from personnel.
