

The Bath and the sanitary trolley intended for the patient's shower in the seating position is designed as the wheeled, lifted chair which helps the care personnel to effortlessly place him or her in the bathtub (after few modifications also in the standard bathroom bathtub). Very practical for showers. **The Bath trolley** is highly appreciated for the versatility including sanitary needs of the disabled and chronically ill patients.

Equipment:

- electric or hydraulic lifting mechanism
- leaning rails
- foot support
- sanitary container
- four wheels with brake

The Bath trolley with the corresponding care bathtub WPC-300/220 becomes "**the integrated system for care** transport and hydrotherapy of the disabled and chronically ill".
